1.4.1

Back Up Files via Google Account

Google's owns the Android operating system so it has its own backup data tools that can be synced with your Google account. If you're signed in to your Google account on your Android smartphone, your contacts are usually synced with your Gmail account. In the event that it isn't synced, head over to Settings > Accounts > Google > Your Google Account and make sure the contacts field is checked.

BACKUP AND RESTORE

Back up my data

Back up application data, Wi-Fi passwords, and other settings to Google servers.

✓

Using computer – PC

Connect the USB cable to the phone, then to a computer.

Note: If necessary, touch the Status bar and drag it down, tap Connected as a media device and then tap Media device to select the check box.

On the computer, click the Open device to view files using Windows Explorer folder or else navigate to and open the phone's disk drive and navigate to the desired folder.

Navigate to the desired folder or location on your device.

Note: The Card icon is your SD card and the Phone icon is your device's internal storage.

Drag and drop the backup files on your computer into the desired folder inside your phone.

When finished, safely disconnect the phone from the computer.
